In-Can Preservation [ca. ppm]

reaction mass of 5-chloro-2-methyl-2H- 100 isothiazol-3-one and 2-methyl-2H-isothiazol-3one (3:1) (CAS 55965-84-9)

Note

According to the EU Biocide Regulation (528/2012/EU), aqueous polymer dispersions are treated articles if they contain ("are treated with") biocidal products for in-can preservation. As such the dispersions don't need to be labelled unless the approval of the applied active substances require so, or a biocidal property for the product is explicitly claimed. The biocides are added only to assure the shelf life of the product during storage and transport to the customer. They are not meant to exert a downstream biocidal effect.
