

# Technical data sheet

# ALBERDINGK® AC 2025

### **Characteristic:**

Multiphase, selfcrosslinking acrylate dispersion with special adhesion promotion to different substrates.

| Specification:         |       |             | According to:                      |
|------------------------|-------|-------------|------------------------------------|
| Solids content         | %     | 48.0 - 50.0 | ISO 3251                           |
|                        |       |             | 1.0 g weighed quantity at<br>105°C |
| pH- value              |       | 8.0 - 9.0   | ISO 976                            |
| Viscosity              | mPas  | 500 - 4000  | ISO 2555, Brookfield RVT           |
|                        |       |             | Spindle 3/rpm 20/factor 50         |
| Further typical data*: |       |             | According to:                      |
| MFFT                   | °C    | ca. 0       |                                    |
| Density                | g/cm3 | 1.0 - 1.1   | ISO 2811-1                         |
| Solvent-free           |       |             |                                    |

### **Applications:**

Shows superior pigment wetting and hydrophobic properties. Suitable for solvent free wall paints with outstanding stain- and scrub- resistance. The film of the polymer is tack free, flexible and very blocking resistant.

### **Further information:**

The binder can be formulated without addition of coalescents. Please note, that during drying, the low viscosity might lead to tension-cracks. A completely formulated lacquer will be free of cracks.

#### Storage:

In originally closed containers ALBERDINGK-dispersions are stable when stored at 20°C for 6 months after delivery date. The recommended temperature-range for storage is 5 - 30°C. Freezing or storage at higher temperatures than 30°C, can affect the viscosity or the average particle size and finally lead to a sedimentation or coagulation. A contamination with bacteria, fungi or algae can damage the product irreversibly. The product is only preserved for the transport. For a longer storage time, we recommend to add additional preservative. A warranty for the sterility after storage can not be granted. ALBERDINGK BOLEY GmbH assures that the data mentioned under "specification" are stable for 6 months after delivery date, if the product is stored under the recommended conditions. A longer storage does not mean that the product is not usable anymore, but we recommend to check the specification data before use. A warranty after 6 months of storage can not be given by ALBERDINGK BOLEY GmbH. The product should be stirred well before use.

## Packaging:

plastic drums (120 kg) one-way container (approx. 1000 kg) as bulk in tank cars, by agreement.

#### Safety:

For further information on product safety please refer to the current safety data sheet.

### **Notice:**

\* General information - the values can not be considered as part of the product specification.
