Applications:

Linseed-Standoil with various viscosities and acid values is used in the production of paints, print-anticorrosive- and aluminium-paints as well as in the production of pigment pastes and brake linings.

Properties:

Linseed-Standoil, when accelerated by driers (siccatives), exhibits outstanding drying properties, excellent flow and gloss, as well as stability, water resistance and weather resistance. Further its elasticity, good adhesion and pigment wetting must be emphasized. Its rheological properties make it particularly suitable for lithographic inks and air-drying letterpress inks.
